CONTENTS OF VOLUME VI.

XXX. JANUARY, 1898.

PAGE

On the Electrical Resistance of Thin Films. ISABELLE STONE 1

An Electric Curve Tracer. EDWARD B. ROSA 17

On the Theory of Megneto-Optic Phenomena. I. C. H. WIND 43

Minor Contributions: (1) On a Method of Obtaining Pores or Capillary Canals of Specified Diameter. *C. Barus.* (2) On the Methods of Measuring Mean Horizontal Candle-Power. *C. P. Matthews* 52

New Books: *J. Scheiner:* Die Photographie der Gestrine. *G. Müller:* De Photometrie der Gestirne. *D. A. Murray:* Introductory Course in Differential Equations 58

XXXI. FEBRUARY, 1898.

On the Disruptive Discharge in Air and Liquid Dielectrics. T. W. EDMONSON 65

On the Theory and Magneto-Optic Phenomena. II. C. H. WIND 98

Minor Contributions: (1) On the Coefficient of Absolute Rigidity of Quartz Fibers and its Time and Temperature Variation. *S. J. Barnett.* (2) On the Specific Inductive Capacity of Certain Oils. *A. L. Clark* 114

New Books: *Wright:* The Induction Coil in Practical Work. *Singer and Berens:* Some Unrecognized Laws of Nature 126

XXXII. MARCH, 1898.

The Attenuation of Sound and the Constant of Radiation of Air. A. WILMER DUFF 129

Minor Contributions: (1) On the Polarization of the Light Reflected from Hard Rubber. *Alice H. Bruère.* (2) On Latitude Variation in a Rigid Earth, as illustrated by Maxwell's Dynamical Top. *Henry Crew.* (3) Apparatus for Illustrating Potential Gradient. *R. W. Wood.* (4) Apparatus for Showing the Conductivity of Gases. *R. W. Wood.* (5) A Vacuum Tube to Illustrate the Slow Diffusion of the Residual Gases in High Vacua. *Ernest Merritt* . . 140

New Books: *Duhem:* Méchanique Chimique. *Anthony and Brackett:* Text-Book on Physics. *Perry:* Calculus for Engineers. *Gerard:* Electricity and Magnetism. Transactions of the American Institute of Electrical Engineers. *Burnside:* Theory of Groups. *Engelmann:* Tafeln und Tabellen zur Darstellung Spektroskopischer Beobactungen. *Schuster:* Practical Physics. *Austin and Thwing:* Physical Measurement. *Wilberforce:* Practical Physics Notebook. *Wiedemann and Ebert:* Physikalisches Praktikum. *Merrill and Baldwin:* Physics Course. *Harrington:* Physics for Grammar Schools. *Hammel:* Observation Blanks. *Gage:* Physical Experiments. *Hall and Bergen:* Text-Book of Physics. *Perry:* Applied Mechanics. *Christiansen:* Theoretical Physics 170

XXXIII. APRIL, 1898.

PAGE

A Comparison of Rowland's Thermometers with the Paris Standard, and a Reduction of his Value of the Mechanical Equivalent of Heat to the Hydrogen Scale. WILLIAM S. DAY 193

On the Susceptibility of Diamagnetic and Weakly Magnetic Substances. ALBERT P. WILLS 223

Minor Contribution: A Résumé of the Experiments dealing with the Properties of Becquerel Rays. *Oscar M. Stewart* 239

New Books: *Wüllner:* Experimental-physik. *Hay:* Alternating Current Working. *Atkinson:* Electric Lighting. *Joyce:* Examples of Electrical Engineering. *Fisher:* The Potentiometer 252

XXXIV. MAY—JUNE, 1898.

Frontispiece.

On the Surface Tension of Liquids under the Influence of Electrostatic Induction. SAMUEL J. BARNETT 257

On the Fall of Potential at the Surface of a Metal when Exposed to the Discharging Action of the X-Rays. CLEMENT D. CHILD 285

An Experimental Determination of the Period of Electrical Oscillations. ARTHUR GORDON WEBSTER 297

Note: William A. Rogers 315

Index 320
